DETAILED ACTION

Response to Amendment

1. Applicant's amendment filed on December 20, 2006 has been entered. No claim has been amended, cancelled, or added. Claims 1 and 4-11 are still pending in this application, with claims 1, 6 and 9 being independent:

Allowable Subject Matter

2. Claims 1 and 4-11 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Applicant teaches a lamp reflector including an injection-molded substrate including bulk molding compound (BMC) having a matrix resin including mainly an unsaturated polyester resin and glass fiber as an inorganic filler, and an additional inorganic filler formed by hollow glass spheres having an average diameter of 15 to 45 μm . The glass spheres are 10 to 40% of the total volume of the BMC, with the total inorganic filler content having a volume ratio of 1.0 to 2.5 to the matrix resin.

BURNELL-JONES (U.S. Pat. 6,599,444) and ANDERSON (U.S. Pat. 6,030,673) disclose individually most of the limitations of the claims. However, the cited references fail to individually disclose, or suggest when combined, the claimed specific volume ratio of inorganic filler in the bulk-molding compound (i.e. the glass spheres being 10-40% to the BMC, and the total inorganic filler content having a volume ratio of 1.0 to 2.5 to the matrix resin).

No prior art was found teaching individually, or suggesting in combination, all of the features of the applicants' invention, specifically the claimed specific volume ratio of inorganic filler in the bulk molding compound.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
